SUMMARY

Senior Android engineer and technical lead with 8+ years building consumer mobile products. At DraftKings, I build and operate native Android at Super Bowl scale for 2.5M+ users and led a large Xamarin-to-Compose migration. I also built and led a mobile department from zero at Epicentr K. My independent EdTech project UAdemy reached 25K+ installs and a 4.9-star rating. My current focus is expanding test automation across unit, snapshot, UI, and integration testing, using JUnit, Robolectric, Roborazzi, Jenkins, and Allure, while redesigning team workflows around an AI-assisted development process with Claude and Codex.

CORE SKILLS

Android: Kotlin, Jetpack Compose, Android Views, Coroutines, Flow, Gradle, Dagger/Hilt, MVVM, Clean Architecture, Navigation, Room, WorkManager, REST, WebSockets

Product and growth: onboarding, retention, A/B experimentation, analytics, Play Console releases, Firebase, Crashlytics

Test automation and quality: unit, snapshot, UI, and integration testing; JUnit, Robolectric, Roborazzi, Jenkins, Allure, UI automation, ANR analysis, macrobenchmark, Perfetto

Leadership: technical direction, mentoring, code review, architecture, hiring, distributed-team delivery

Other: Kotlin Multiplatform, Compose Multiplatform, Flutter, Xamarin, C#, .NET, Figma, AI-assisted development

EXPERIENCE

DraftKings - Senior Software Engineer

October 2021 - Present · Remote

- Build and operate native Android features for a product serving 2.5M+ users.
- Own reliability and on-call work at Super Bowl scale, with 12M+ bets and peaks of about 59K bets per minute.
- Led a large migration from Xamarin to native Android with Jetpack Compose.
- Work across performance, observability, release quality, incident response, technical direction, and cross-functional delivery.

Epicentr K - Head of Mobile Application Development

July 2020 - March 2021 · Ukraine

- Built and led the mobile department from zero at Ukraine's largest retailer, with about 75 hypermarkets.
- Set architecture, engineering standards, CI/CD, and release processes; hired and mentored the team.

Epicentr K - Lead Xamarin Developer

March 2020 - July 2020 · Ukraine

- Laid the technical foundations for cross-platform mobile development before moving into the department-lead role.

Trinetix - Senior Xamarin Developer

May 2017 - March 2020 · Ukraine

- Built cross-platform mobile products across finance, health, and enterprise clients.

High Marks - Xamarin Developer

January 2017 - May 2017 · Ukraine

- Started my professional career building cross-platform iOS and Android applications with Xamarin.

PROJECTS

UAdemy - Founder / Lead Developer · March 2022 - May 2023

App Store

- Founded an independent EdTech product and led a remote team of six through wartime constraints.
- Shipped to 25K+ installs and a 4.9/5 rating from 796 reviews.
- Set up coding guidelines, branching, incident playbooks, CI/CD, and release delivery.

Opora - Anxiety and stress self-help app · Kotlin Multiplatform, Compose Multiplatform

- Independent product, released on the App Store (iOS). Ukrainian-language self-help app with one-tap SOS resources, breathing and grounding exercises, a daily check-in, a journal, and sleep and stress checks.
- Private by design: works offline, no account, no tracking. Shared Kotlin code for Android and iOS.

TomorrowPack - Reusable packaging · Flutter, Dart

- Independent MVP built end to end for a reusable-packaging startup.

EDUCATION

BSc, Computer Software Engineering - Lviv Polytechnic National University, 2016-2019

Associate degree, Computer Engineering - Khmelnitsky Polytechnic College, 2012-2016
