

Yurii Babii

Lead Android Engineer

Nice, France (remote) | yurii.babii.work@gmail.com | +33 6 29 87 52 91 | linkedin.com/in/yuriibabii | yuriibabii.github.io

SUMMARY

Lead Android engineer, 8+ years, high-scale (2.5M+ users, ~59k bets/min at Super Bowl peaks) — and the teams and processes behind the code. Led an entire app's migration from Xamarin to native Compose, act as project captain across initiatives, and built a mobile department from zero. Strong in Kotlin, Jetpack Compose, KMP, reliability, and CI/CD. Open to a CDI (statut cadre), remote from Nice or across France.

Work authorization: resident in France, self-managing my status change — no sponsorship-from-abroad required.

CORE SKILLS

Android: Kotlin, Kotlin Multiplatform (KMP), Compose Multiplatform, Jetpack Compose, Coroutines, Flow, MVVM, Redux, Hilt, Dagger, SQL, REST, WebSockets, JUnit, Perfetto

Leadership: team building, hiring, mentoring, architecture & standards, coding guidelines, release trains, incident playbooks

Reliability & Observability: New Relic, Crashlytics, Datadog, incident response, on-call, release/quality processes

CI/CD & Tooling: Firebase, Azure, AppCenter, Google Play Console, App Store Connect, TestFlight

Cross-platform: Flutter, Dart, Xamarin.Forms, Xamarin.iOS, Xamarin.Android, C#, .NET

Other: Supabase, Figma, AI-assisted development (Cursor, Claude Code)

EXPERIENCE

DraftKings Inc. — Senior Software Engineer (Android) October 2021 - Present | Remote

- Led the full migration of a large standalone app from Xamarin to native Android with Jetpack Compose — the reliability foundation for a Sportsbook serving 2.5M+ users.
- Project captain on numerous initiatives: owned scope, drove delivery, and coordinated across the Android team end to end.
- Covered tens of on-call shifts spanning the entire native Android app; diagnosed and resolved incidents fast under Super Bowl-scale load (~59k bets/min, 12M+ bets).
- Improved observability across the app — built New Relic dashboards and alerting; defined the metric/log/trace taxonomy adopted by the team.
- Drove app performance with regression gating and continuous monitoring of in-app and end-to-end metrics.

Gemplay (UAdemy) — Founder / Lead Developer (side-venture) June 2021 - March 2023 | Remote

- Founded an EdTech startup and led a remote team of 6 through wartime constraints, keeping delivery steady.
- Shipped to 25K+ installs and a 4.9-star rating from 796 reviews.
- Established engineering process from scratch: coding guidelines, branching strategy, incident playbooks, CI/CD.

iFIT — Senior Android Engineer (Contract) November 2020 - March 2022 | Remote

- Delivered connected-fitness Android features: BLE device connectivity, real-time workout metrics, video streaming for at-home workouts.
- Drove stability, observability, and performance for daily active users.

Epicentr K — Head of Mobile Application Development July 2020 - March 2021 | Ukraine

- Launched the in-house mobile apps department from zero at Ukraine's largest retailer (~75 hypermarkets).

- Set architecture and standards, established CI/CD and release trains, hired and mentored the team that shipped multiple internal apps.

Epicentr K — Lead Xamarin Developer March 2020 - July 2020 | Ukraine

- Led cross-platform mobile development and set technical direction ahead of the department launch.

Trinetix LLC — Senior Xamarin Developer · May 2017 - March 2020 · Ukraine Cross-platform mobile apps (Xamarin) for enterprise clients in finance and health.

High Marks — Xamarin Developer · January 2017 - May 2017 · Ukraine First engineering role — cross-platform iOS/Android; started full-time at 19.

PROJECTS

Animoosh — Kotlin Multiplatform (KMP), Compose Multiplatform · in progress Startup app helping military personnel with psychological challenges, sleep, and stress. Shared KMP codebase across Android, iOS, and web. · yuriibabii.github.io

TomorrowPack — Flutter, Dart · MVP shipped App for a reusable-packaging startup. Built the MVP end to end.

EDUCATION

Bachelor's degree, Computer Software Engineering — Lviv Polytechnic National University (2016-2019)

Associate's degree, Computer Engineering — Khmelnytsky Polytechnic College (2012-2016)

CERTIFICATIONS

Jetpack Compose Masterclass — Philipp Lackner
