

# Yurii Babii

## Lead Android Engineer

Committed to human wellbeing

### SUMMARY

I'm a **France**-based **Lead Android** engineer with **8+ years** building reliable, user-centric mobile products. Over the years, I realized, my focus belongs in **wellbeing and productivity**—and that's where I'm now doubling down.

Nice, France

### IMPACT HIGHLIGHTS

- **Team leadership:** built and led mobile teams (Epicentr K), ran a remote team of 6 during the war for UAAdemy, mentored engineers, and owned release/quality processes.
- **High-rated apps:** founded UAAdemy and led to 21,000+ downloads with a 4.9★ rating from 650+ reviews.
- **Product mindset:** shipped features tied to engagement and revenue; data-driven decisions via analytics and experimentation.
- **Wellbeing domain:** delivered a smooth user experience during workout at home, providing hardware connectivity and video streaming (iFIT).
- **System resilience:** DraftKings marked my shift to native Android—hardened reliability and on-call amid 12M+ bets, 2.5M users, and Super Bowl peaks of ~59k bets/min.

### Languages

English (Full Professional)  
French (Basic)  
Ukrainian (Native)  
Russian (Fluent)

### Certifications

Jetpack Compose Masterclass  
Philipp Lackner

### Education

Bachelor's degree in Computer Science

### TECHNICAL STACK

- **Android:** Kotlin, Jetpack Compose, Coroutines/Flows, MVVM, Redux, Hilt/Dagger, SQL, REST, WebSockets, JUnit, Perfitto;
- **CI/CD:** Firebase, Crashlytics, New Relic, Azure, AppCenter, Play Console, App Store Connect, TestFlight;
- **AI:** Cursor, Claude Code, ChatGPT, Mistral;
- **Other:** C#, .NET, Flutter, Dart, Xamarin.Forms, Xamarin.iOS/Android, Supabase, Figma;

### PROFESSIONAL PATH

- **I've built and led mobile department from the ground up:** at Epicentr K—Ukraine's largest retailer with ~75 hypermarkets—I launched the in-house apps department, set architecture/standards, put CI/CD and release trains in place, and hired/mentored the team that shipped multiple internal apps.
- As **founder of UAAdemy**, I **led a remote team of 6** through wartime constraints to launch the iOS app (**21k+ installs, 4.9★**) and keep delivery steady. **I'm a process builder** by nature—coding guidelines, branching strategy, incident playbooks—and hands-on with instrumentation (metrics/log/trace taxonomy, dashboards & alerting via New Relic, Crashlytics, AppCenter, internal tools).
- **DraftKings** was the start of my **native Android** path after years in cross-platform, I operated in **high-stakes, high-scale conditions**—12M+ bets from **2.5M users** with peaks around ~59k bets/min at the Super Bowl—hardening reliability and on-call response.
- I bring that attitude to **wellbeing with iFIT**, where I delivered connected-fitness features (BLE devices, real-time workout metrics, video streaming) and drove stability, observability, and performance for daily workouts.
- Early in my career I shipped **cross-platform apps (Xamarin; now also Flutter)**, so I naturally design with feature parity and shared layers in mind—and **I know iOS well enough** to partner tightly, release flows, and platform constraints.

### WHAT'S NEXT

I'm looking to lead a wellbeing product—owning quality, roadmap execution, and a healthy engineering culture that ships inclusive, habit-forming experiences. I believe a work company is your second family, and I'm looking for one.

### PROUD MOMENTS

- Founded UAAdemy, making a meaningful impact in my country and earning heartfelt appreciation from users.
- Started working at 19, becoming the youngest employee at a 400+ person software company.
- Represented my university and city in programming Olympiads, earning placements and sparking a lasting passion for problem-solving.

### A BIT ABOUT ME

- I'm a proud owner of a beautiful half-Husky.
- I love staying organized and active — currently experimenting with WHOOP, health protocols, and training for my first half-marathon.
- I find peace in yoga and exploring spiritual growth, and I genuinely enjoy spending time in calendars, notes, and task lists — it's my way of creating order and focus.
- Lately, I've discovered the vast world of electronic music, and I'm enjoying how my taste evolves as I dive deeper.

### EXPERIENCE

#### DraftKings Inc.

Senior Software Engineer

October 2021 - Present (4 years 2 months)

#### Gemplay (UAAdemy)

Founder / Lead Developer

June 2021 - March 2023 (2 years 8 months)

#### iFIT

Senior Software Engineer

November 2020 - March 2022 (1 year 5 months)

#### Epicentr K

- Head of Mobile Application Development  
July 2020 - March 2021 (9 months)
- Lead Xamarin Developer  
March 2020 - July 2020 (5 months)

#### Trinetix LLC

Senior Xamarin Developer

May 2017 - March 2020 (2 years 11 months)

#### High Marks

Xamarin developer

January 2017 - May 2017 (5 months)

### EDUCATION

#### Lviv Polytechnic National University

Bachelor's degree, Computer Software Engineering · (2016 - 2019)

#### Khmelnitsky Politechnic college

Associate's degree, Computer Engineering · (2012 - 2016)
